

Comments / Feedback related to professional focus:

Really met the target, utilized the entire room and circulated to all targets

Self-reflection related to the professional experience, feedback provided, and/or post-conference conversation:

I found that this goal really improved the way the lesson went. Not only was I aware of everything that was happening in the classroom, but I also found that students were more engaged and on task. Once I began moving around, it was no longer something I had to think about and it helped me pace out and explain the lesson better.

Next steps / for future practice:

I will be continuing to work on this goal, and explore technologies that make it easier to not have a fixed space in the room. I will also look into other teaching and learning methods that allow myself and my students to be more mobile during the lesson.
