Hi Ashley,

That looks fun how you have created some codes to help Mario, I appreciate your consistency to be able to receive a certificate. I wonder how long did it take to complete that session because I found Coding abit challenging to create something. Great work!

Best,

Uzma

Hi Sarah,

Integration of digital citizenship education in the various forms of curriculum will definitely help children to provide a comprehensive picture of using digital tools safely.

I agree with you that if we provide a comprehensive approach about digital literacy, kids will be more responsible using it. I liked your realistic thoughts, I enjoyed reading it.

Best,

Uzma

Hi Chantelle,

You did it, it's beautiful!

I liked how you beaded with a flower pattern, looks amazing! Keep it up your beading learning journey. I'm looking forward to see your next work!

Hey Madison,

That looks amazing!

You've done a fabulous work, good job for your hard work and being consistent with your creative look!

I really liked the mirror along with a small towel rack, they're looking cute!

Uzma!

Hi Everett,

I really enjoyed your reading your honest opinion about the Magic School and how you've provided the information about different features of it. I agree with you, though lots of AI tools are helpful but we definitely need to develop our experience. Thank you for sharing your quizzes creation review, it was interesting to read it.

Hi Megan,

I had that kind of tiring week earlier, it's not fun for sure. I hope you feel better and can continue your learning with good health.

Best,

Uzma
