ChatGPT

🔗 chat.openai.com

ChatGPT is an OpenAI tool that has two interfaces, web-based, or app-based that responds to dialogue prompting. There are free and paid subscription options which includes access to creating images and using voice for input and output.

ABOUT

User Experience
Ease of integration and usage

ChatGPT has been developed in a way that allows it to understand and respond to user questions and instructions. Sometimes writes plausible-sounding but incorrect or nonsensical answers. Is sensitive to tweaks to the input phrasing or attempting the same prompt multiple times. The model is often excessively verbose and overuses certain phrases. It will sometimes respond to harmful instructions or exhibit **biased** behavior, so users should carefully review its content. If you are looking for more specific purpose you can explore and add GPTs.

Security & Privacy
Safeguarding student information

OpenAI does collect data to help models learn about language and how to understand and respond to it; you can request to opt out of having your data used by making a privacy request. ChatGPT uses three information sources: information that is publicly available on the internet, information licensed from third parties, and information that users provide.

Diffit

🔗 web.diffit.me/

Diffit
For Teachers

Teachers use Diffit to get "just right" instructional materials, saving tons of time and helping all students to access grade level content. Diffit has [free and paid subscription](#) options.

ABOUT

User Experience
Ease of integration and usage

You can search for results or add a URL, PDF, YouTube link, or upload a document to export at an approximate grade level and language as: Adapted Reading Passage, Summary, Key Vocabulary Words, Multiple Choice Questions, Short Answer Questions, Open-ended Prompts, and export student activities and informational slides.

Security & Privacy
Safeguarding student information

Diffit only collects teacher names, email addresses, and IP addresses for the sole purpose of providing the Diffit service. In addition, we use real sources and show citations for ALL informational texts we provide – so you can know exactly where any AI-generated text comes from. All data is encrypted in transit and at rest. Diffit is FERPA and COPPA compliant.

Goblin.Tools

Goblin.Tools is a collection single-task tools, mostly designed to help neurodivergent people with tasks they find overwhelming or difficult. Magic ToDo breaks down tasks into steps (task analysis with editing options) and estimates how long each step will take. All tools: Magic ToDo, Formalizer, Judge, Estimator, Compiler, and Chef.

ABOUT

User Experience

Ease of integration and usage

Goblin.Tools uses a single interface for each tool. Prompts can be typed or using speech to text embedded into the tools. You can copy and paste the results as needed. Magic to do allows exporting results and cloud synchronization (beta feature).

Security & Privacy

Safeguarding student information

All data stored in your browser is kept secure and is not accessible by anyone else. Goblin Tools does not have access to this data.

"We use the information stored in your browser to personalize your experience on Goblin.Tools. This data stays on your device and is not sent to us or any third party." (Goblin Tools Privacy)
