Luke Skywalker and Group Work

Luke Skywalker works in groups with his fellow Jedi every day 2,3,5,7 in science. Luke knows a lot about science. Luke likes to share his good ideas with the other Jedi's. Luke remembers that the other Jedi's in his group do not always take his ideas or they change the idea. Luke does not get upset, instead he takes a **deep breath** and **says "good idea"** to his group members. Luke remembers that **his ideas are good** ones but it is important to let other people talk. If he has another idea, he can **put his hand up** to signal an idea.

1. Everyone has ideas ___
2. Take a deep breath ___
3. Say "good idea" to other group members ___
4. Remember his ideas are good ones ___
5. Puts his hand up when he has an idea ___

Be a group member like Luke Skywalker not Darth Vader
