

## Professional Development Plan

Topic: Science

Date: October 27 2021

Teacher Amberlee Dayman.

Observer Cheri Medowcroft

<p>1. Professional Goal Learning to Plan -understanding and becoming familiar with the curriculum for the applicable grades.</p> <p>Learning to Review Relate and Reflect -Considering both the actions of the pre-interns and responses of the students.</p>	<p>2. Steps to Achieve Goal -I examined the curriculum in both Grade 1 and grade 2 to find indicators that would relate so I could create a lesson together for both groups.</p> <p>-I have considered the actions of myself in this lesson by making a detailed set development closure aspect on my lesson plan. I have considered the students response by adding student questions into the lesson plan.</p>
---	--

### 3. Instructions for Observer:

- Did my lesson plan address both Grade 1 and grade 2 curriculum content?
- Is it evident that I have an understanding of Grade 1 and Grade 2 curriculum?
- Do I wait for students to respond and give input?

### 4. Data Collection

Hands up  
✓✓✓✓

Choral Responses after you reviewed the lifecycle.

### 5. Other Comments

Great review of characteristics.  
Had students wait until you explained everything before they asked questions.  
Students transitioned well to their tables and got to work.  
Bronson knew what to do. 😊

You floated + checked for ontask behaviour.  
- offered extension questions + encouragement.

Gave a warning about time ending.
